

E.P. "TOM" SAWYER STATE PARK

502.245.2296

Located in the northeast "end" of Louisville, this urban park is a refuge from the fast-paced life of a busy city. The Sawyer Hayes Community Center was built in 2009. Its natural stone and woody exterior is in harmony with the natural landscaping that flourishes throughout the park. The interior continues the theme of natural beauty with the welcoming Hearth Room featuring a large fireplace encased in Brazilian marble and stone brick, stone flooring from Italy and exposed beams. The floor-to-ceiling windows and organic color palette of the Woodlands and Persimmon rooms give the illusion that you have immersed yourself in the woods.
